REDSEAL

RedSeal Professional Services

Operational support to achieve the business outcomes you expect

Fast-track your success

Today, staying ahead of network security and compliance risk is an increasingly complex challenge. Threats, best practices, regulations, and technologies are constantly evolving. Internal teams may struggle to keep up, leaving gaps in your defensive strategies that take focus away from your business and mission.

Whether your internal teams are short on staff, lacking skills, or simply overwhelmed, the RedSeal Professional Services Team stands ready to provide the operational support you need to make the most out of your investment in RedSeal technology.

The RedSeal platform is a powerful weapon in the battle against cyber risk. We can provide as little or as much assistance as you need to fine-tune your environment, get your internal teams up to speed, and reap every possible benefit.

Accelerate time to value and maximize ROI—from one-off assessments and day-long engagements to annual commitments of full-time staff.

We look forward to using our knowledge and experience in security, compliance, and RedSeal technology to help you accomplish your goals.

Professional Service Days

RedSeal offers professional services days that can be customized to your business needs. Services include:

- Deploying RedSeal
- System integration with third party tools
- Troubleshooting existing installation
- Designing unique solutions
- Onboarding team members and training
- Health checks to evaluate, prioritize, and address cyber threats across your attack surface

RedSeal gives you the experienced staff you're looking for. We've got you covered:

- Dedicated RedSeal security engineer and project manager
- Pre-defined deliverables
- Fixed price transaction
- Seemless remote access
- Onsite visits as needed; 4 hour minimum

Your RedSeal engineer implements the platform, delivers assessments and recommendations, and establishes a security baseline.
